How to Get Registered Lables on Fire-Rated Doors

Door Factory must machine door for all hardware & verify that requirements are made

- Fill in our form 1 completely, cost of machining (approx.\$50) & \$10 for lable

Customer may machine door for hardware, then return door for labeling

- We can only lable doors whose hardware meets code; labelling must be done at our premises. Cost, \$10 for lable

Customer installs door to code, Warnock Hersey comes to site, labels doors

- Cost \$200 - \$700 depend on quantity & time spent on site.

No lable may be fine!

- This is mostly for old buildings, retro-fit; The door will be identified as a fire door by an ink stamp on the top of the door. Local Fire Marshalls have the jurisdiction to accept this. Frames and Hardware on retrofits may not meet code, so the reasoning is, door is fire-rated, the rest confirms to the code in effect of the time of building construction.
